## ASX RELEASE

31 January 2007

### Assay Results from Drilling, Kihabe Zinc Project, Botswana Mount Burgess Mining N.L. 100%

Further assay results using the ICP-OES method have been received from RC resource infill drilling on the above project, (see diagram attached).

#### Section 11,900E

**KRC082** 11,894E/10,094N, Dip - 60 deg, Azimuth 159 deg.  
 Drilled to test for mineralisation down to 100m RL and also to test for extensions to mineralisation to the north east.  
 The hanging wall dolomite/quartzite contact was logged at 117m.

From	To	Zinc	Lead	Copper	Vanadium	Silver

103	104					
104	105					
105	106					
106	107	incl 3m 5.76%				

End of Hole 120m

The above results are from an infill resource drilling programme conducted by the Company to upgrade this 2.4km long zone of zinc, lead, silver, copper and vanadium mineralisation to a JORC compliant resource.

**These results indicate the potential for this zone of mineralisation to extend both at depth and further to the east.** Further drilling on the northern side of section 12,000E and east of section 12,000E will be conducted to test this.

These results are provisional and are subject to recheck by an independent laboratory. For an initial resource calculation the Company has engaged an independent laboratory to recheck some 1,800 samples. Of these, 1,200 samples have now been rechecked and the remaining 600 samples are currently being processed in the laboratory.

The information in this report that relates to exploration results, together with any related assessments and interpretations, is based on information compiled by Mr Giles Rodney (Rod) Dale of G R Dale & Associates, who is a non-executive Director of the Company. Mr Dale is a Fellow of The Australasian Institute of Mining and Metallurgy. Mr Dale has sufficient experience which is relevant to the style of mineralisation under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the "Australasian Code for Reporting of Mineral Resources and Ore Reserves". Mr Dale consents to the inclusion in the report of the matters based on this information in the form and context in which it appears.
